EXPANDEAD BROADHEADS - TEXT FOR ARTICLES

Flies tight and accurate with field tip precision... then explodes to over 1.5" diameter at impact!

150 WORD DESCRIPTION

ExpanDead is the only broadhead engineered with a Hassle-Free O-Ring Pivot System and Lock-Arm Technology, which guarantee its massive .040" thick blades will be completely open to over 1.5" at entry and during penetration. Razor sharp, stainless steel blades and heated-treated steel tip assure ExpanDead will hit with devastating impact and cause extensive tissue damage.

ExpanDead Broadheads generate their destructive force with an innovative body and three high performance blades attached with our patented Hassle-Free O-Ring Pivot System and Lock-Arm Technology. While in flight, the blades hold tight to the body for pinpoint accuracy. Immediately on impact, the powerful tip blasts the blades open and locks them into a cutting position of over 1.5"! Blades are guaranteed to stay completely open for giant entry and exits holes. Hassle-Free O-Ring Pivot System protects o-ring so you can reuse it shot after shot without rehooking it! Design allows you to shoot it with blades open or closed - you choose! Either way the results are deadly.

100 WORD DESCRIPTION

ExpanDead is the only broadhead engineered with a Hassle-Free O-Ring Pivot System and Lock-Arm Technology, which guarantee its massive .040" thick blades will be completely open to over 1.5" at entry and during penetration. Razor sharp, stainless steel blades and heated-treated steel tip assure ExpanDead will hit with devastating impact and cause extensive tissue damage.

ExpanDead Broadheads to utilize our patented Hassle-Free O-Ring Pivot System and Lock-Arm Technology. While in flight, the blades hold tight to the body for pinpoint accuracy. On impact, the powerful tip blasts the blades open and locks them into a cutting position of over 1.5"! Either way the results are deadly.

45 WORD DESCRIPTION

ExpanDead Broadheads are engineered with a Hassle-Free O-Ring Pivot System and Lock-Arm Technology. While in flight, blades hold tight to the body. On impact, the powerful tip blasts the blades open and locks them into a cutting position of over 1.5"! The results are deadly.

FEATURES

- Revolutionary tip-activated, rear blade deployment
- Blades expand to over 1.5" cutting diameter for giant entry and exit holes
- Hassle-Free O-Ring Pivot System protects o-ring so you can reuse it shot after shot and o-ring stays on the tip so you don't have to rehook it after each shot!
- Lock-Arm™ Technology locks blades open at entry and keeps them open for complete penetration
- Variable o-rings included to adjust blade tension for low and high poundage bows
- Perfect for crossbows - built for speed, strength, and accuracy
